

Field Trips

Visit Rabbit Crest Farms

Get your students outside of the classroom and into the great outdoors on a working, organic vegetable and flower farm, just 10 minutes from Downtown Greenville and 5 minutes from Highway 153 in Powdersville.

Embark with your class on a unique educational experience to a working organic farm. Our 11 acre farm sits close to Downtown Greenville and Powdersville and boasts lush, open fields of vegetables and flowers that we tend by hand using regenerative farming practices.

Take a walk through our growing fields, step inside a greenhouse, see chickens, learn about native plants, and even enjoy lunch in our gardens. We are passionate farmers who love teaching about plants, ecosystems, insects, animals, and the importance of small scale, regenerative agriculture!

Educational Objectives

Field trips are available in many curriculums. We can work with you to make sure field trips are able to meet your educational standards. Example field trip lessons include:
